Most successful architects in Japan are in fact very educated individuals; they hold several masters from the best universities in Japan like Tokyo University and some even additional degrees from Ivy League universities in America like Harvard etc I can only speak for myself, and all I can say is that I have no regrets, and that I love my work; that is real success. As for the success you are referring to, as in all my projects this could be for several reasons.Â Cite: Ebrahim Abdoh. "Japan-ness in Architecture" is a beautiful blend of personal and historical explorations that reveal the sources of styles whose effects continually define structural identities and transformations throughout 'Japanese' history. This is one of the best books I have read on the interaction of Japanese history and culture.Â The Japan-ness is a series of essays written by the same author in a span of many years, mainly 25 years from 1960 to 1985. The book is a must if you are interested in understanding the roots of the metabolism, the reason under Kenzo Tange works and so on. Overall the success of Japanese contemporary architecture has its motivation in the struggle of many to during the postwar years which culminated, with the Yoyogi stadium in 1965 by the K. Tange hands. ARCHITECTURE IN JAPAN (1039 articles). architecture in japan surveys the contemporary condition of the country's built environment, showcasing a range of innovative projects and the diverse materials and unconventional forms employed in their construction.Â PRODUCT LIBRARY. a diverse digital database that acts as a valuable guide in gaining insight and information about a product directly from the manufacturer, and serves as a rich reference point in developing a project or scheme.
