This eighth edition of Leadership: Theory and Practice is written with the objective of bridging the gap between the often-simplistic popular approaches to leadership and the more abstract theoretical approaches. Like the previous editions, this edition reviews and analyzes a selected number of leadership theories, giving special attention to how each theoretical approach can be applied in real-world organizations. Each chapter includes an application section that discusses the practical aspects of the approach and how it could be used in today's organizational settings. Three case studies are provided in each chapter to illustrate common leadership issues and dilemmas.
