

Sustainable development strategies: A resource book

Barry Dalal-Clayton and Stephen Bass

National Strategies for Sustainable Development 2002

http://www.nssd.net/res_book.html#contents.

This book is a cornerstone resource for a wide range of organisations and individuals concerned with sustainable development at national and local levels, as well as for international organisations concerned with supporting such development. While the focus is on integrated strategies for sustainable development, the approaches and methods covered are equally relevant to poverty reduction, environmental and sectoral strategies, programme development and review. Agenda 21 called for all countries to develop sustainable development strategies. For such strategies to be effective there needs to be a real commitment. In every country, government at all levels, the private sector and civil society must work together in a true partnership, in transparent ways which enable genuine stakeholder participation. The necessary mechanisms and processes need to be coordinated to enable continuous learning and improvement. This resource book provides flexible, non-prescriptive guidance on how to develop, assess and implement national sustainable development strategies. It sets out principles and ideas on process and methods, and suggests how these can be used. It is based on an analysis of past and current practice, drawing directly from experience in both developed and developing countries. Following a discussion of the nature and challenges of sustainable development and the need for strategic responses to them, the heart of the book covers the main tasks in strategy processes. Individual chapters offer a rich range of guidance, ideas and case studies on:

- The nature of sustainable development strategies and current practice
- Key steps in starting, managing and improving sustainable development strategies
- Analysis of and for sustainable development

- Participation for sustainable development
- Information, education and communications
- Strategy decision-making frameworks and procedures
- The financial basis for strategies
- Monitoring and evaluation systems

The book includes a free CD-Rom of full text and extensive related material. The book is downloadable in sections from http://www.nssd.net/res_book.html#contents.

The high-level United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development was convened at United Nations Headquarters in New York from 5 to 9 June 2017, coinciding with World Oceans Day, to support the implementation of Sustainable Development Goal 14. The Special Session also focused on the strategies to be adopted for the BPOA implementation and in particular on resource mobilization and finance, sustainable development strategies, resource development, capacity building This resource book provides flexible, non-prescriptive guidance on how to develop, assess and implement national sustainable development strategies. It sets out principles and ideas on process and methods, and suggests how these can be used. It is based on an analysis of past and current practice, drawing directly from experience in both developed and developing countries. Following a discussion of the nature and challenges of sustainable development and the need for strategic responses to them, the heart of the book covers the main tasks in strategy processes. SUSTAINABLE DEVELOPMENT STRATEGIES Georgian Ardeleanu¹, Radu Petrariu² Abstract. The concept of sustainable development means the totality of the forms and methods of socio-economic development, whose foundation is primarily to ensure a balance between these socio-economic systems and the natural capital elements. This book is a cornerstone resource for a wide range of organizations and individuals concerned with sustainable development at national or local levels, as. Whilst the focus is on integrated strategies for sustainable development, the approaches and methods covered are equally relevant to poverty reduction, environmental and sectoral strategies, programme development and review. The Special Session also focused on the strategies to be adopted for the BPOA implementation and in particular on resource mobilization and finance, sustainable development strategies, resource development, capacity building, globalization and trade liberalization, transfer of environmentally sounded technology; a vulnerability index; information management through strengthening the SIDS Network; and international cooperation and partnership. The 14 priorities, identified by the BPOA, are the following: climate change and sea-level rise, natural and environmental disasters, management of wastes, coastal and marine resources, freshwater resources, resources, energy resources, tourism resources, biodiversity resources, national institutions and... Organization for Economic Cooperation and Development (OECD). IIED (International Institute for Environment and Development). Abstract: Monographic Series no. Includes bibliographic references and an index. Includes CD-Rom of full text and extensive material. ISSN SUSTAINABLE DEVELOPMENT STRATEGIES Georgian Ardeleanu¹, Radu Petrariu² Abstract. The concept of sustainable development means the totality of the forms and methods of socio-economic development, whose foundation is primarily to ensure a balance between these socio-economic systems and the natural capital elements. With all the progress made in recent years, is a reality that Romania still has an economy based on intensive use of resources, a society and an administration still in search of a unitary vision and a natural capital affected by the risk of damage that may become irreversible.
