ARTICLE :SOCIOLINGUISTICS. Posted by Educationist & CO. June 28, 2015 June 28, 2015. 5 Comments on ARTICLE :SOCIOLINGUISTICS. Name: SOCIOLINGUISTICS. Sociolinguistics is the study of the relationship between language and society. Historical sociolinguistics. Dialectology – this is equally similar to the study of different Varieties of English. Discourse Analysis. Conversation Analysis. Language planning and policy. Sociolinguistics is a move towards studying language performance, and there are two arguments on why this should be studied within language. As a fairly new discipline areas of inquiry in the past primarily studied language in relation to “linguistic competence”™. Micro sociolinguistics. Macro sociolinguistics. Besides growth areas such as multilingualism, a current trend is convergence of established approaches. My discussion focuses on those that go even further, bridging the gap between macro- and micro-levels of analysis in the historical context of study. “What are sociolinguistics?” asks Allan Bell (2013) in his recent Guidebook to Sociolinguistics. Research on gender speech variation in sociolinguistics has taken roughly two differing but complementary directions, namely, showing the extent of speech variation among men and women on the one hand, and identifying and analysing the linguistic moulds both genders couch their self-perception and interpersonal perception, on the other. This area of study simultaneously belongs to the fields of child language and bilingualism research. Thus the methodological insights gained from these two fields should inform studies of bilingual first language acquisition (Cite.
