A strong diversity and inclusion strategy can help your organization attract top talent and drive innovative results. Here’s how to launch a D&I initiative that works. For each individual to bring their best self forward, a sense of belonging must first be established. Having a connection to an organization or group of people that makes you feel you can be yourself not only results in greater engagement and creativity in the workplace, it’s a psychological need. But these changes take time, and they aren’t always linear, Clark says. It’s not a one-size-fits-all approach, either that’s why it’s so important to share best practices and be open to trying new things. The good thing is that as you’re working on diversity, you can also work on inclusion, and vice versa. Diversity, Recognition and Shared Citizenship in Canada, ed. Banting, K., Courchene, T.
