John Muir Laws, commonly known as "Jack," recently published a book, *The Laws Guide to Nature Drawing and Journaling*, and I admit when I first heard of it, the price made me blink and move on. However, I kept hearing rave reviews about it so I finally decided to order a copy. I am not sorry I did. I have an entire shelf of books on nature sketching and painting, but this one could probably replace them all. When the book arrived, I was pleasantly shocked by its massive size; it's a good inch thick and filled with material. The contents aren't organized by chapters but instead are grouped. This book provides clear, straightforward text complemented by step-by-step illustrations, dozens of exercises lead the hand and mind through creating accurate reproductions of plants and animals as well as landscapes, skies, and more.
