Description:

Research is often an intimidating topic in a counselor training program-but it doesn't have to be. This text helps to alleviate readers' concerns while helping them learn what they need to know. It presents the most essential components of research and illustrates them with meaningful examples, enabling users to master each component. Recognizing that the profession of counseling has entered the age of accountability, Erford developed RESEARCH AND EVALUATION IN COUNSELING to help educate counselors and future counselors about research and evaluation procedures so that their treatment of clients can be more effective and efficient. Organized into three topical sections, the second edition addresses the curricular requirements of the Council for Accreditation of Counseling and Related Educational Programs (CACREP), providing the latest information on research, statistics, and evaluation procedures.

This article reviews the evaluation literature on financial education and counseling for adults in order to synthesize implications for research and practice. Most evaluations report positive impacts, but the findings are often small when compared with valid comparison groups. Many evaluations use self-reported measures, measure outcomes over short time periods and cannot rule out selection bias due to nonrandomized designs, all of which may bias results. Although future research and practice in this field hold promise, more attention to theory-based evaluations and further investment in randomized... Other methodology-oriented evaluators perceive evaluation as nearly synonymous with experimental research methods. Thus, an emphasis on the experiment or quasi-experiment as the appropriate methodology for social science research/evaluation was lauded by Campbell and Stanley (1963) and embraced by a generation of evaluation researchers. The evaluation text by Rossi et al. (1999) most closely reflects this viewpoint. Only RUB 193.34/month. Research and Evaluation in Counseling - Planning for a Needs Assessment. STUDY. Flashcards.Â collect demographic information and evaluate multiple facets of a counseling program, including services offered, topics of interest addressed, and goals/objectives pursued. Focused assessments. are usually short, one-page surveys that assess a specific topic of concern. Articles published in Counseling Outcome Research and Evaluation (CORE) from 2010â€”2019 were analyzed using meta-study procedures for trends over time related to author characteristics (e.g., gender, work setting, domicile, leading contributors and institutions) and article content (e.g., typology, research methodology, characteristics of participants, research design, statistics used, report of effect size, reliability and validity). Nearly all author and article characteristics displayed stable trends over time. The proportion of research articles increased significantly and CORE now joins the upper echelon of counseling family journals at a rate of more than 75%. CORE is in some...
